RE: ESTCP Sediment Deposition Detector DemVal

Enclosed are the results of analyses for samples received by the laboratory on 20-May-2016. The samples associated with this report will be held for 90 days from the date of this report. The raw data associated with this report will be held for 5 years from the date of this report. If you need us to hold onto the samples or the data longer than these specified times, you will need to notify us in writing at least 30 days before the expiration dates. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Jenifer Milam For Dale Rosado, Ph. D.

Chemist

Case Narrative

No issues were experienced during the analysis of Work Order 6052001 unless specified below.

Grain Size and Bulk Density was cancelled because we didn't have enough sample.

PCB Congeners are still be processed.

TOC for samples SedTrap-1-Comp-OP-031516 and SedTrap-5-Comp-OP-031516 were cancelled based on insufficient sample amount.

Notes and Definitions

- U Analyte included in the analysis, but not detected
- M2 Sample was diluted due to matrix interference.
- M Matrix spike recovery is outside established acceptance limits
- J Detected but below the Reporting Limit; therefore, result is an estimated concentration.
- H Analysis was performed outside of the method prescribed holding time.
- DET Analyte DETECTED
- ND Analyte NOT DETECTED at or above the reporting limit
- NR Not Reported
- dry Sample results reported on a dry weight basis
- RPD Relative Percent Difference

RE: ESTCP Sediment Deposition Detector DemVal

Enclosed are the results of analyses for samples received by the laboratory on 02-May-2016. The samples associated with this report will be held for 90 days from the date of this report. The raw data associated with this report will be held for 5 years from the date of this report. If you need us to hold onto the samples or the data longer than these specified times, you will need to notify us in writing at least 30 days before the expiration dates. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Jenifer Milam For Dale Rosado, Ph. D.
Chemist

Case Narrative

No issues were experienced during the analysis of Work Order 6050205 unless specified below.

Bulk Density was cancelled due to insufficient sample volume.

PCB Congeners are still being processed.
